

EMPOWERING Enterprises

with a Unified Sustainability Intelligence Hub

THE POWER OF SUSTAINABILITY

For us, sustainability is more than a goal — it's the cornerstone of resilient communities, forward-thinking development, and lasting impact.

Investor Confidence & Value Creation

Regional and Global Benchmark

Risk Analysis & Reputation for organizations

Enduring Legacy for future generations

Unified Impact at group and subsidiary level

SUSTAINABILITY INTELLIGENCE HUB

For enterprises, sustainability intelligence must operate seamlessly across every level and dimension.

Scale

- Subsidiaries
- Business Units & Departments
- Projects & Assets
- Suppliers & Value Chain
- People & Expertise

Aspects

- Environmental, Social & Governance (ESG)
- Local Economy & Community Impact
- Circularity & Resource Efficiency
- Strategic Initiatives & Innovation
- Targets, KPIs & Performance Tracking
- Supplier Rating & Value Chain Engagement
- Reporting, Assurance & Audits

SUSTAININSIGHT THE BLOOMBERG OF SUSTAINABILITY

An Emirati innovation, born in Dubai, built to empower organizations with intelligence, integration, and impact to achieve their sustainability objectives

ESG STANDARDS AND COMPLIANCE

Aligned with global and national frameworks, SustainInsight simplifies compliance and elevates reporting integrity

Comprehensive Coverage

- Addresses all ESG disclosure topics.
- Maps reporting requirements across multiple international frameworks and guidelines

Streamlined Assurance

- Facilitates collaboration with auditors and third-party verifiers.
- Ensures accuracy, transparency, and trust.

Unified Reporting Foundation

- Integrates carbon and financial data.
- Delivers consistent, decision-useful insights.

Integrated Frameworks

GRI | BRSR | CDP | GRESB | IFRS S1 & S2 | SASB | TCFD | CSRD | ISSB | UAE Green Agenda | California SB 253 & SB 261 | Other global standards

AI-POWERED DATA CAPTURE

Turn any document, voice note, or system feed into structured ESG data – automatically.

AI OCR

- Extract data from invoices, utility bills, certificates, receipts, and reports
- Automatically digitize structured and unstructured documents

Voice-to-Text

- Capture site observations and inspection data hands-free
- Convert speech into structured ESG records instantly

Smart Data Capture

- Import from Excel, PDFs, emails, ERP systems, and IoT devices
- AI validates and categorizes data automatically

AI Bulk Upload

- Upload thousands of documents in one click
- Auto-classify, validate & map data to the right entities and periods

One AI engine to capture every sustainability data point.

ONE-CLICK SUSTAINABILITY REPORTS

Generate every report your stakeholders and regulators need — instantly.

Automatically Generate

ESG Reports

Sustainability Reports

GHG Inventory Reports

Board & Executive Reports

Regulatory & Framework Reports

AI Narrative Generation

- Executive summaries
- KPI analysis
- Performance highlights
- Recommendations
- Improvement opportunities

Built-in Data Validation

- Detect missing data
- Flag anomalies
- Verify completeness
- Improve reporting accuracy

From raw data to executive-ready reports in minutes.

SUSTAINIQ AI ASSISTANT

Your conversational analyst for ESG data, risk, assurance, and reporting.

Conversational AI

"Show my emissions trend"

"Generate this month's report"

"Compare business units"

"Identify high-risk suppliers"

AI Risk Analysis

- Detect reporting gaps
- Identify emission hotspots
- Monitor compliance risks & unusual data patterns

AI Assurance

- Continuous data validation
- Audit readiness & compliance checks
- Reporting confidence

Interactive AI Analytics

- Real-time dashboards, KPI trends & carbon footprint analysis
- Energy, Water & Waste insights
- Executive graphs & benchmarking

Ask. Analyze. Report. Improve — Powered by SustainIQ AI.

AUDIT AND CERTIFICATION

SustainInsight makes audits seamless with all data and certifications in one platform, while ensuring transparency, credibility, and compliance with international best practices

Single Source of Truth

Immediate, reliable access for third-party auditors

Operational Alignment

Platform verification, tailored processes

Assurance Analytics

Dynamic tracking of verification progress across entities and reporting cycles.

AI Anomaly Detection

Real-time detection of data inconsistencies, emission spikes, and reporting issues.

Role-Based Access Control

Secure, auditable access with granular user permissions for teams, auditors, and stakeholders.

SMART REPORTING AND DASHBOARDS

SustainInsight transforms data into clear, compliant, and actionable reports for every level

Generative AI for narratives, KPIs, and summaries

Quarterly & annual reports

Board-ready and executive dashboards

Custom templates aligned with regulations

Real-time progress tracking

Industry-Specific Dashboards

Regulatory Compliance Dashboards for CSRD (EU), CBAM, GRI, and other global reporting frameworks.

UAE Climate Compliance Monitor

SUPPLIER RATING

Driving accountability and sustainability across the supply chain through transparent supplier evaluation

Unified Evaluation

Rates suppliers on ESG, emissions, compliance, safety, and certifications

Performance Insights

Benchmark suppliers against industry and standards

Integration

Links supplier data with procurement, contracts, and material passports.

Strategic Value

Enhances supply chain resilience, reduces risks, and supports Net Zero 2050 goals.

ICV Score Alignment

Integrates In-Country Value (ICV) scoring to prioritize suppliers contributing to local economic development.

Nation

Contribution to national development through local partnerships, economic growth, and alignment with government priorities.

SEAMLESS DATA INGESTION

Flexible and automated data collection ensures accuracy, efficiency, and scalability across the ecosystem

Structured & Unstructured Inputs

- Predefined forms for standard data entry
- OCR-enabled processing of invoices, receipts, bills, and other unstructured documents

Smart Integration

- Pre-built templates for quick imports
- Direct integration with SAP, ERP, Salesforce, and custom in-house applications

IoT & Smart Infrastructure

- Automated collection from IoT sensors and smart meters
- Real-time data ingestion for timely insights

BOQ INTELLIGENCE MODULE

Upload BoQ, system auto-extracts materials & quantities

Categorizes items, links to emission factors

Provides design-stage baseline emissions

Empowers early, data-driven sustainability decisions

MATERIAL PASSPORT

Digital passports for materials (composition, carbon, recyclability, supplier)

Integrated with procurement, ERP, and asset registries

QR / RFID access during construction, O&M, and decommissioning

Tracks circularity index, carbon savings, supplier ratings

Supports Net Zero 2050, reduces lifecycle costs, drives supply chain accountability

BUILT FOR ENTERPRISES

CUSTOMIZATION SECURITY AI INTELLIGENCE

Customization

Data collection forms, workflows, dashboards, reports etc

Security & Compliance

Role-based permissions, security and data hosting aligned with local regulations

AI & LLM Features

- Automated data ingestion with error detection
- OCR for unstructured documents
- SustainInsight Bot for real-time queries
- AI-generated sustainability reports
